

# A Very Ambitious Target?

The University has been awarded SFC funding to increase outward student mobility by 40%  
**Staff engagement is vital to help us meet this target**

## Mobilise

Only 1% of our students participate in international exchanges

Participation varies widely across Faculties and is particularly low among Scots-domiciled students

We work with over 100 partner institutions in 25 countries. Funds are available for students & staff

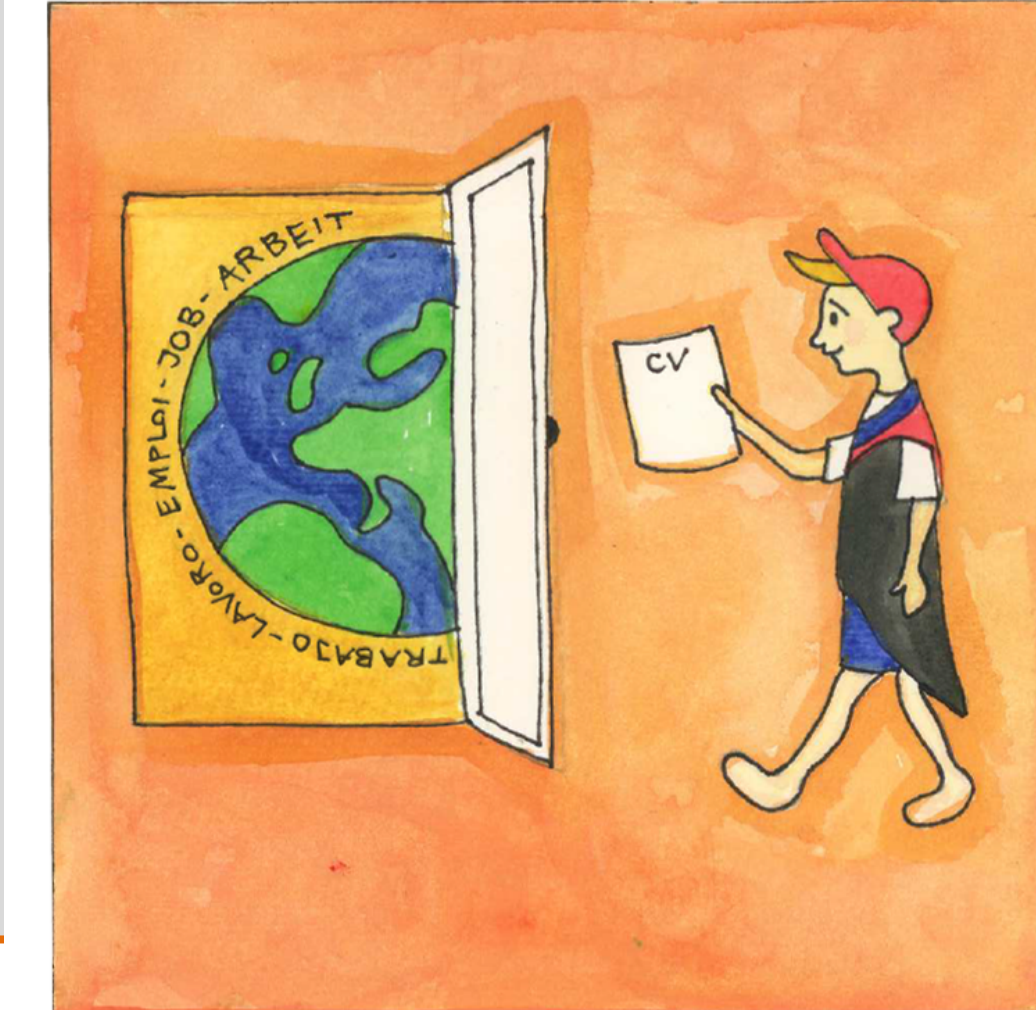

## Internationalise

Internationalise your programme by actively promoting study and work placement opportunities to students

Source new overseas study destinations and increase the options

Give students an international perspective and improve the student experience

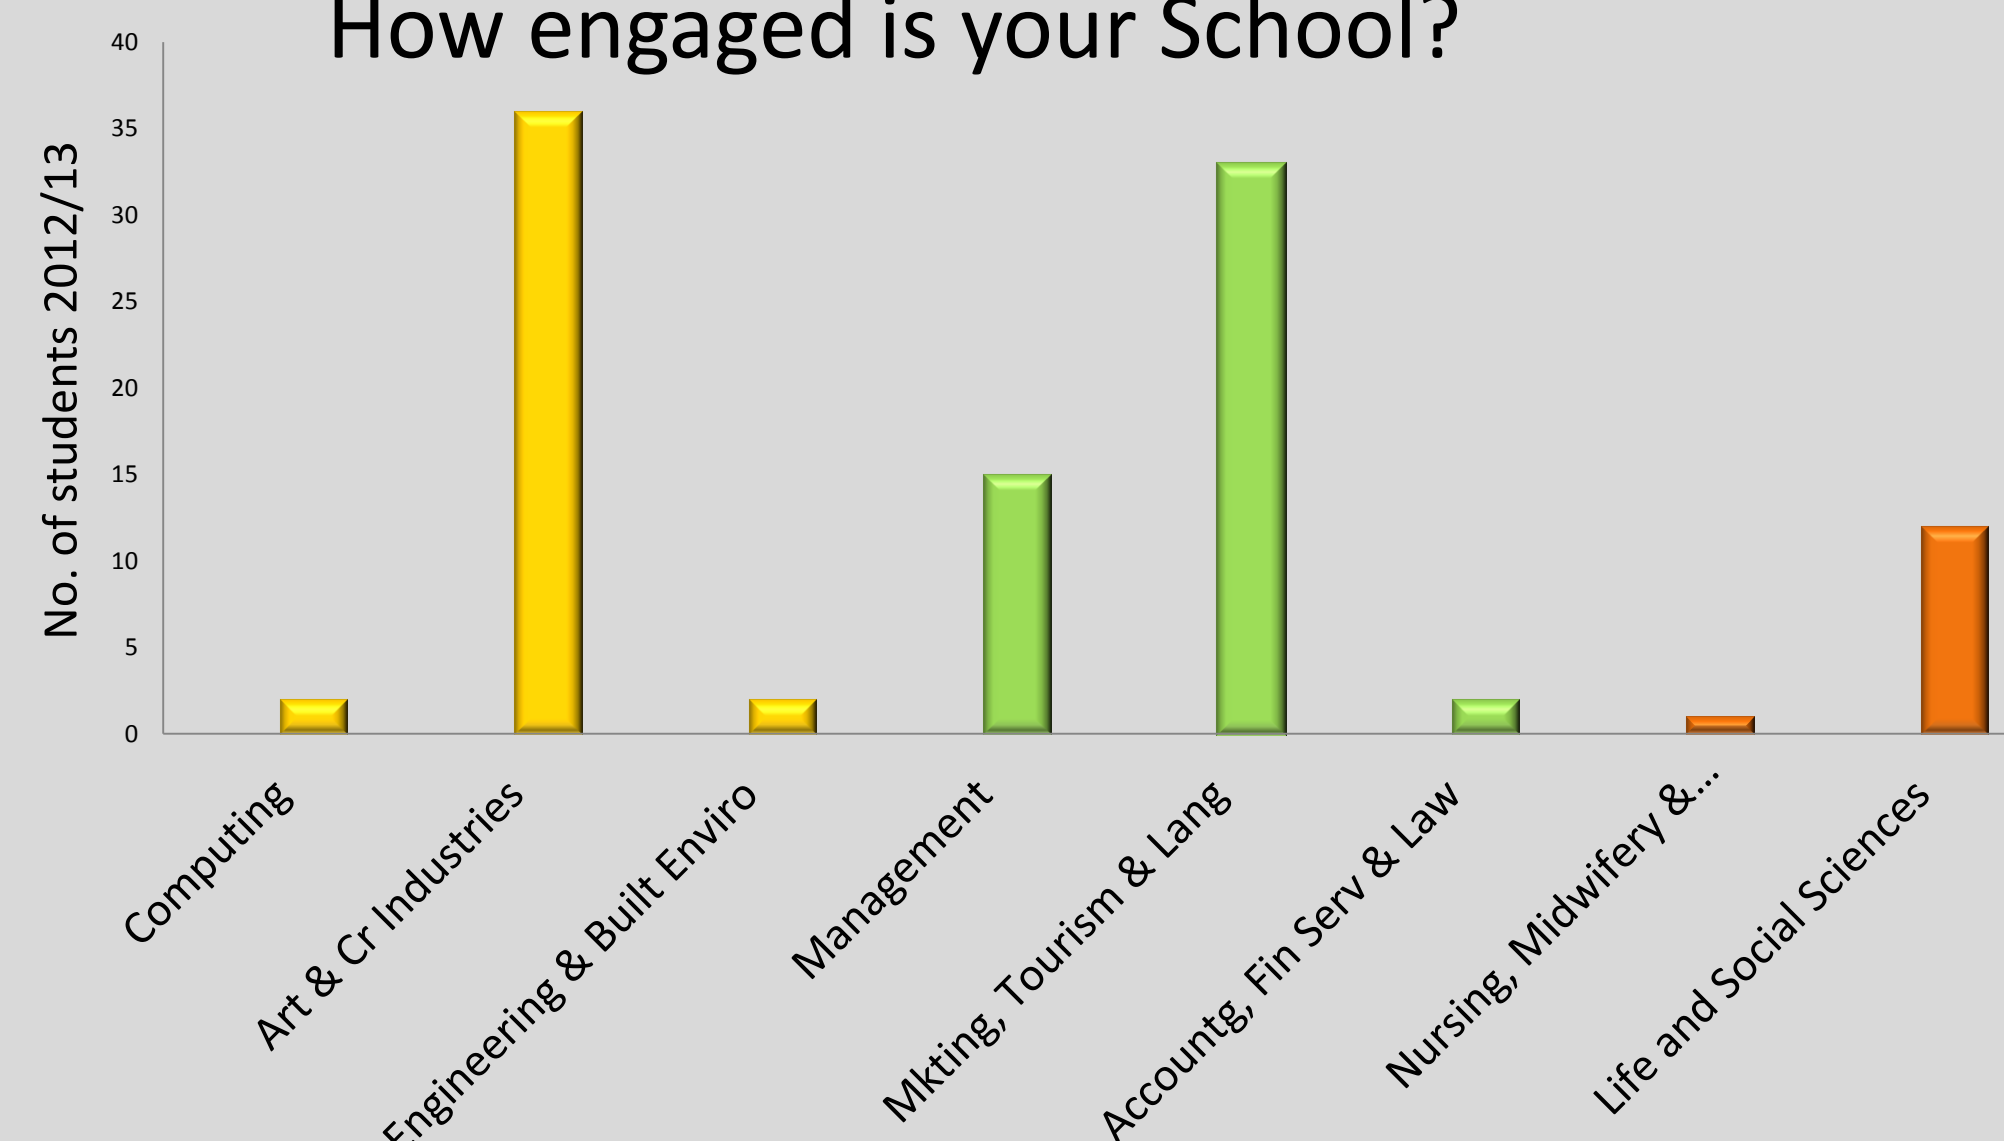

## Maximise

Research shows that international mobility improves student performance and enhances graduate employability

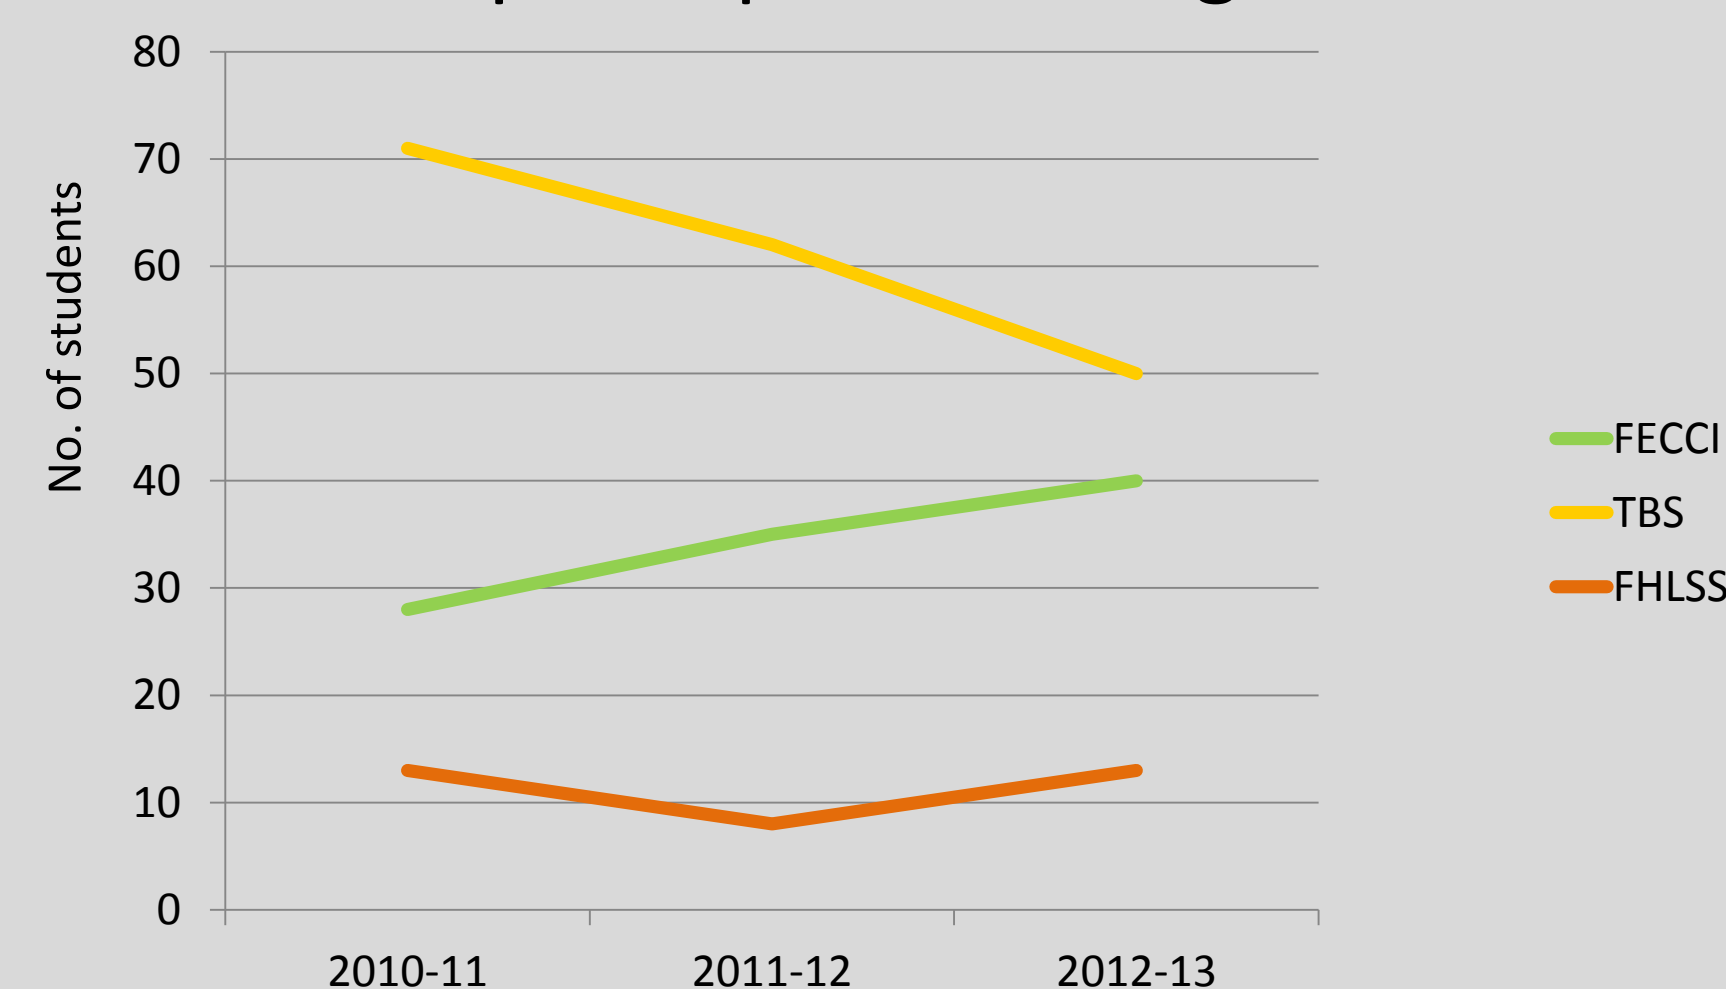

Employers are increasingly looking for graduates with a global mindset

We work closely with Careers to help students articulate skills gained abroad when job-seeking

How engaged is your School?

How has participation changed ?

How is academic performance affected?
