

Edinburgh Napier University

Timetable Policy

1. Introduction

1.1. This policy sets out the guiding principles and parameters which inform the University's planning, prioritisation and management of timetabled space. It seeks to embed core principles which support the delivery of an excellent, personalised student experience and enable a consistent approach to timetabling.

1.2. The purpose of the timetable is to enable the planning of teaching events and indicates when students are expected to attend. The policy therefore covers the timetabling of the University's on-campus undergraduate and postgraduate teaching and learning provision. It also indicates the slots available for students to undertake independent study.

2. Guiding Principles

2.1. The timetable will be designed based on the following principles:

- i) To provide timely and accurate timetabling and room booking information to students and staff.
- ii) To prioritise the teaching and learning activities of students.
- iii) To facilitate a programme based approach that stresses the holistic coherence of the student learning experience.
- iv) To meet the pedagogic imperatives as identified by the teaching staff.
- v) To rationalise and make efficient use of space and resources.
- vi) To deliver equality of access to teaching facilities.
- vii) To ensure the timetable is:
 - a. always up to date and accessible to all
 - b. as accurate as possible throughout the year
 - c. produced on an annual basis
 - d. underpinned by accurate data entry
- viii) To recognise the need for all programmes to have suitable space / facilities.
- ix) To assume teaching will start promptly on the hour and finish 10 minutes to the hour.
- x) To free up Wednesday afternoon after 13.00hrs to encourage students to participate in student-led activities.

- xi) To maximise space utilisation within the constraints of the core principles.
- xii) To make available all non-specialist teaching space for general use outside teaching activities.
- xiii) To ensure the guiding principles are be adhered to by all staff and operated consistently across Schools and campuses.

2.2. The timetable will be constructed on the basis of accurate and up-to-date data. While some similarity from year to year is desirable, neither time slots, nor the rooms allocated for teaching activities are automatically rolled forward from one year to the next.

2.3. A range of factors will be taken into account when developing the timetable to meet the needs of students and staff. These will include:

- **Specialist resources** - Where teaching activities have set requirements
- **Learning & teaching styles** - Where a specific teaching space is requested
- **Sequencing** - When the preferences is for tutorials to follow lectures
- **Breaks** - A break time of one hour will be scheduled between 12.00 and 2.00
- **Teaching period** - No more than 4 hours of consecutive classes/teaching
- **Scheduling** - Avoiding large unscheduled gaps between teaching events on the same day, e.g. a teaching event on a Monday at 9 to 10 with no further event scheduled until Monday 4 to 5.
- **Distribution of lectures** – Avoiding an undesirable distribution of lectures e.g. all teaching on the same two days or conversely spread sparsely across all five days.

3. Timetable Prioritisation

3.1. The following are guidelines for the prioritisation of teaching and learning activities:

- Teaching activities will be take precedence in the teaching period.
- Examinations will take precedence during the examination period.
- Larger classes will have precedence over smaller classes.

- Compulsory modules will be given priority over optional modules.
- Combinations of compulsory modules on programmes will be scheduled so that they do not clash.
- Learning events which are regular and over a full-semester will have precedence over sporadic or single-week events.
- Activities which have a longer duration will take precedence over events of a shorter duration.
- For specialist resources, precedence will be given to learning activities which explicitly require access to the specialist equipment and/or accommodation.
- Precedence will be given to teaching and learning activities over non-teaching events (see section 10 below)
- Wednesday afternoons will be kept free for students wherever possible.
- Precedence will be given to students on undergraduate and postgraduate degree programmes.

4. Teaching Space

- 4.1. Teaching space refers to rooms identified by Property & Facilities as designated space within which teaching can take place.
- 4.2. All teaching space is managed centrally with the exception of specialist laboratory and studio space which is managed by Schools.
- 4.3. In general, Schools which are based at a given campus will have first priority for booking the teaching space at that campus.
- 4.4. The number of participants in any teaching event must not exceed the authorised capacity of the room allocated.

5. The Teaching Week

- 5.1. The current timetabling parameters for the teaching week are set out below.
 - i) The first day of the teaching week is a Monday.
 - ii) The standard teaching week extends from Monday to Friday.
 - iii) Standard teaching hours are from 09:00 to 18:00 except for Wednesday (see v below)
 - iv) Teaching activity can be scheduled outside the standard hours where this has been considered as part of a School's quality assurance processes and is clearly set out in promotional materials, for example to meet student/employer demands for either evening

or weekend provision. This is most likely to apply to part-time and postgraduate provision.

- v) On Wednesdays, teaching events will normally be scheduled to take place from 09:00 to 13:00 in order to facilitate participation in student-led activity in the afternoon.
- vi) Teaching starts promptly on the hour and ends at 10 minutes to the hour, to allow students and staff to move on to their next teaching event.

5.2. These timetabling parameters will be kept under review by the University's Leadership Team.

6. Teaching Blocks

- 6.1. Where possible, activities for each module will take place within a compact block of time.
- 6.2. Activities such as tutorials and practical modules requiring specialist space/equipment will be timetabled (where possible) into the slots that are likely to meet student needs.
- 6.3. Taken together, the teaching blocks are expected to deliver a holistic, programme-based, student experience.

7. Teaching Events

- 7.1. Teaching events are associated with an approved module.
- 7.2. Modules are designed and delivered by programme teams. Each School will determine the format of the modules and programmes they deliver, including:-
 - The start date of the module and number of weeks over which it will run
 - The number of teaching events per week
 - The format and duration of each teaching event
 - The teaching staff who will deliver the event.

8. Timetable Publication

- 8.1. The teaching timetable will be published for a full academic year for each student. Individual student timetables will be made available on myNapier".

- 8.2. Changes to the teaching timetable after publication should be kept to a minimum. Changes requests from staff will only be made on an exceptional basis.
- 8.3. In the event that a teaching space booking is no longer required, the person who has booked the room must inform Professional Services as soon as is practicable so that it can be released for other purposes.

9. Students

- 9.1. This policy supports the responsibilities and expectations contained in the current [student charter](#)
- 9.2. The University expects students to play an increasingly active role in their own learning and to attend all timetabled classes.
- 9.3. The University will keep to the schedule of teaching and give reasonable notice of any unplanned changes to classes and seminars (for example if a member of academic staff is ill);
- 9.4. Students and staff will be notified of changes following the agreed 'notification process'.
- 9.5. In accordance with the University's policy on equality and diversity, the University will endeavour to make reasonable adjustments to accommodate students with individual requirements relating to disabilities.

10. Non-teaching Events

- 10.1. Centrally-managed teaching space may be used for a wide range of both internal and external non-teaching events.
- 10.2. Bookings for internal teaching events and examinations will take precedence over bookings for internal non-teaching events.
- 10.3. Internal non-teaching events include :
 - Welcome weekend for new students
 - Applicant Visit Day(s)
 - Post Graduate Open Day
 - 6th Year Conference
 - School Induction Day(s)
 - Main University Open Day

These events are prioritised for timetabling purposes and scheduled before the timetable is released to staff.

- 10.4. Following final publication of the teaching timetable, staff from Schools and Professional Services may make room booking requests for any available centrally-managed teaching space.
- 10.5. External non-teaching events include external conferences/lectures/meetings, research symposiums, weddings and professional body networking events.
- 10.6. Requests for conferences or any event which involves external parties or the charging of any fee must be made via Conferencing & Lettings.
