# Grading in WebPA

First the groups need to be allocated their mark before anything can be exported.

Students don't have access to their marks in WebPA so it's only tutors that can see this.........

After allocating group marks you create a mark sheet so that each's student's group mark is mediated by their peer rating (you can create more than one mark sheet).........

Here you decide the % of the group mark that's peer assessed. For example group **Tut1-Fand** is given 70%......

a) PA Weighting of 0% would mean each student receives a score of 70%.
b) PA Weighting of 50% would mean each students receives a score of 35% plus the other 35% mediated by the peer rating.
c) PA Weighting of 100% would mean each student's 70% is entirely mediated by their peer rating.

Algorithm Parameters

Enter the parameters to use below. When you've made your changes, click the *create mark sheet* button.

What percentage of the group's total mark should be peer-assessed?

PA Weighting 100% ∨

Next decide of any penalty for students who do not provide a peer rating. There will be groups where at least once student did not complete the form, and WebPA compensates for this by applying a multiplication factor to each student mark in the group (see FAQ). So you don't have to apply a penalty, and any you do will affect all non-completers regardless of whether they had a valid reason for not doing so.

If a student has not submitted any marks for the assessment, how much should they be penalised?

Penalty for non-completion 0% ∨ of their final grade.

create mark sheet

Once you create a mark sheet then a bunch of reports become available to you for display/download the data. You can create more than one mark sheet if you would like to play around with the PA Weighting and Penalty values, eg.

Marked assessments for 2015/16

These assessments are both closed and have been marked to produce student grades.

Report assessment
scheduled: Fri, 4th September, 2015 at 9:00 - Mon, 7th September, 2015 at 14:00
student responses: 5 / 5 - **COMPLETED**

Mark Sheet
