

## Moodle Exams – Grading with a Turnitin Rubric

The Exams server uses Moodle Assignments for receiving student answer documents, and a copies are sent to Turnitin for originality checking.

Students do not have access to the Turnitin report, and so this Moodle Assignment-Turnitin arrangement is not designed providing feedback. However marking teams can use Turnitin Feedback Studio to overlay comments and to enter grades that are hidden from students.

**Note:** Ensure that the **Marking workflow state**  $\neq$  Released to keep grades hidden students.

Also ensure the final grade is correct in the Moodle Assignment so that you can export marks from the gradebook to a spreadsheet.

The rubric will be available from the side panel. Note that the grade entered here will **sync with Moodle only once**.

Therefore check the Moodle grade and ensure the **marking workflow status is not 'released'** as this setting will reveal the grade to students.
