

Copying Panopto Videos to Other Modules

This guide shows how to copy Panopto videos from one Moodle module to another. Panopto folders are created for Moodle modules after being 'provisioned' using the Panopto block.

1. Locate the Moodle folder and use the checkboxes to select the video(s). Click the *Copy* button.

2. Type the target Moodle course code in the pop-up window and select from the available results. You will need to have access to the target Moodle course, and it must have been previously provisioned.

3. Once the Moodle course code has been selected click the *Copy* button.

Copy session(s) to [LS001159 - Panopto](#) Copy ✕

Development

Other people can see items in this folder

The copied sessions will have the same owners as the original sessions.
The copied sessions will have the same availability settings as the original sessions.
The copied sessions will inherit viewer permissions from their folder.

1 Lecture 1 - History of Cartography

2 Week 1 - Cartography and Astronomy

4. The green ticks indicate a successful copy. You can check the target Moodle course folder by following the link. Otherwise click the **X** to close the pop-up window.
