

Making Forums Confidential to Groups and Enabling the 'Reply' Button

Prior to creating the Forum, students must be organised into groups and the groups collated into a 'Grouping'. Consult guidance on working with Groups in Moodle if you are unfamiliar with these steps.

In the Forum settings, the following are critical:

'Group Mode' = 'Separate groups' 'Grouping' = The Grouping you have set up.

The key step after this is when you create a post. Firstly, choose one of the groups in your grouping as shown below, and then **'Add a Discussion Topic**'

This will bring up a form with more options. Once you have added the title and text of your post, scroll down. Make sure there is a specific group selected and then tick the 'Post a Copy to all Groups' box.
